## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-50 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

The prior art taken singly or in combination does not teach or suggest method of performing clear operations in a region having a subregion, comprising: performing an initialization routine responsive to a first clear command, wherein the initialization routine comprises eliminating stale information from all pixels outside the subregion; and responsive to a subsequent clear command: updating a current clear count for the region; and writing the updated current clear count into clear count values associated with all pixels outside the subregion.

The closest prior art shows a clearing method having clear command and clearing some portion but does not disclose updating a current clear count for the region; and writing the updated current clear count into clear count values associated with all pixels outside the subregion.
